About Tiger Team

2 Bridge Tiger Team is a cross-functional team of R&D experts and experienced healthcare executives from various domains.

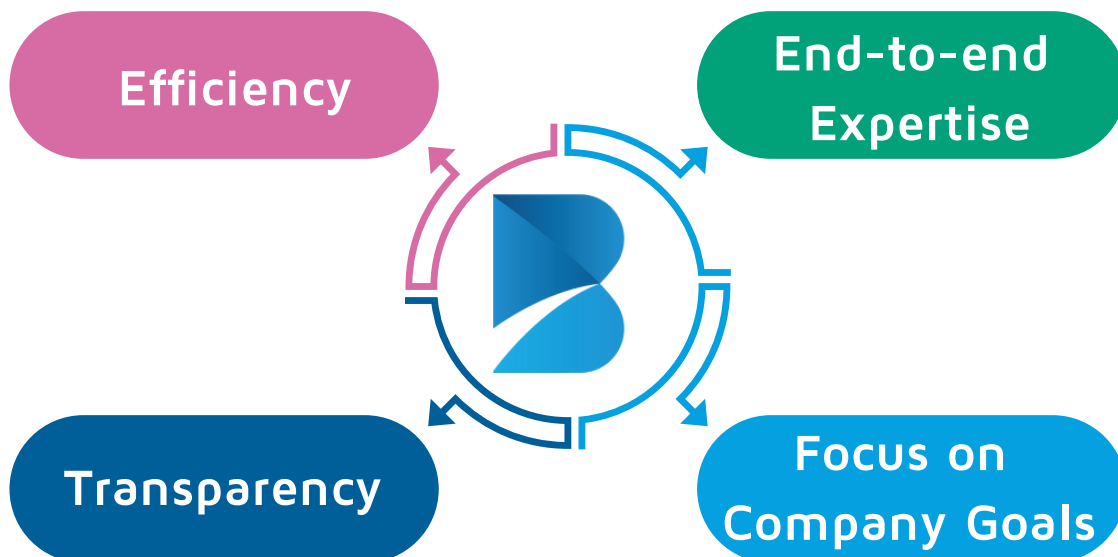

A team tailored to your evolving project needs...

We take care of your projects as if they are our own by carefully assembling the 2 Bridge Tiger Team. To support our clients, our Tiger Team provides strategic and operational support based on the project's specific needs and we adapt the Tiger Team force according to the trajectory of the project to ensure a continuously 'added value' throughout the collaboration.

Why Choose Us

Our Tiger Team experts are used to working together as one team and can seamlessly blend into your team in the most efficient way.

By choosing 2 Bridge Tiger Team, you immediately benefit from the unique advantages of working with an ecosystem:

- Seasoned healthcare executives and R&D leaders
- Rapid execution of R&D and business plan
- No redundant recruitment for individual experts
- The right expertise at the right time
- A team with complimentary knowledge and experience
- Continuous value creation throughout the project

Together, we bring science to life!

Neurology

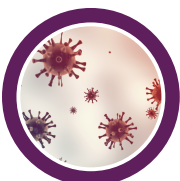

Immunology

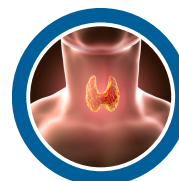

Cardiovascular Diseases

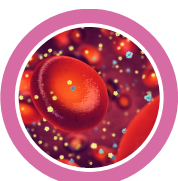

Infectious Disease

Endocrinology

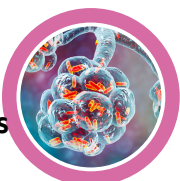

Metabolic Disorders

Geroscience

Respiratory Tract diseases

Dermatology

Oncology

Ophthalmology

Gastrointestinal Disorders

What Do Our Clients Say

“

There is not enough room in this survey to describe the expertise, experience, professionalism, organization, collegiality, and the highest quality of work output.

Our work with 2 Bridge was extraordinary. Each program had a very experienced program leader for whom milestone achievement within agreed timelines was a recurrent and purposeful agenda item. Each team member we worked with had many years of experience and was able to apply that experience to the programs.

Our collaboration with 2 Bridge was a true partnership that helped us (a US-based company) establish a real presence in Europe - with enhanced access to EU KOLs, EU regulatory expertise, and an understanding of the nuances of clinical development in Europe and Eastern Europe.
