

The Go-to Partner to Build Your Life Science Company

2 BRIDGE

Science to Life

Our Unique Approach

Building a life science company is a complex and multifaceted task. At 2 Bridge, we offer an efficient approach that combines scientific brilliance with strategic excellence. Our collaborative team of scientists and executives work hand-in-hand, ensuring a harmonious blend of rigid science and business, resulting in a formula for success.

The Power of Science

At 2 Bridge, we understand that the heart of any successful life science company lies in its scientific foundation. We don't only provide a single scientist; we can deliver a cross-functional team of scientists with different expertise. Our scientists are equipped with the knowledge and skills needed to turn groundbreaking ideas into reality. They're the fuel that powers your journey toward the patients.

Leadership in Healthcare

While science drives your business forward, experienced leadership propels it to new heights. That's where our seasoned healthcare executives come into play. Backed by decades of industry knowledge, they deeply understand the healthcare landscape, market trends, strategic thinking. Our executives are here to guide you, ensuring that your company navigates smoothly through every phase of your life science journey.

Life Science Company Building

Your vision for a groundbreaking life science company deserves the very best, and that's precisely what we offer at 2 Bridge, a unique blend of scientific experts and seasoned healthcare executives to pave the way for your company's success.

Our team can support your company's setup, growth, and development. This includes strategic planning, hands-on support, and advice on best practices for managing and operating a life science company.

Together, we build valuable companies from assets...

Why Choose Us

Cost-effective

- Our company offers flexible on-demand R&D support throughout the project, resulting in lower costs compared to hiring full-time employees with similar profiles.
- Our transparent and competitive fee structure allows you to stay focused on R&D expenditures.

Low-risk

- Our independent and experienced expert opinion helps you avoid unnecessary trial-and-error processes in the early phases of your project.

Seamless Collaboration

- We ensure a speedy execution of R&D plans upon funding, with no delay in hiring and onboarding.
- Our team does not only seamlessly blend into your existing team but also make sure a smooth transition from full-time management to the exit options.

Continuous Value-creation

- Thanks to our vast in-house scientist group, we can continuously add experience and value in different trajectories of your project.

The Expert Says...

“

Solid science is the foundation, but not enough to be a successful biotech, you also need to create a solid company around it.

Working with 2 Bridge, you immediately benefit from a cross-functional team with seasoned healthcare executives and R&D experts, avoiding cost-intensive trial-and-error process.

”
