

# Marine Water Testing

## Marine Water Testing

Ensuring water quality is crucial for compliance, crew health, and environmental protection. Normec Verifavia's Marine Water Testing service analyzes ballast, potable, bilge, and various types of waste water to meet IMO, MARPOL, VGP and local regulations.

We deliver fast, accurate assessments. Whether for routine monitoring or compliance audits, our tailored solutions help shipowners prevent pollution, avoid penalties, and maintain sustainable operations.

## Is Your Vessel's Water Quality Compliant?

Water quality is a critical factor in maritime operations, impacting crew health, environmental responsibility, and vessel compliance. With growing international regulations such as the IMO Ballast Water Management Convention, VGP, MARPOL, and local port discharge standards, shipowners and operators face increasing scrutiny over ballast, potable, bilge, and wastewater discharge. Normec Verifavia's Marine Water Testing service provides accurate, efficient, and fully compliant solutions to ensure regulatory adherence while promoting environmental sustainability.

## Why Choose Normec Verifavia?

- Comprehensive Testing
- Speed, Accuracy & Digital Integration
- Global Reach with Compliance Expertise
- Sustainability-Driven Compliance Approach

## Process

1

**Quotation and Documentation**

2
